LOGISTICS MANAGEMENT ASSOCIATES

Training Course Schedule
2027

20 January 2027 — Model-Based Product Support Summit (MBPS) — $495

A One-day Virtual Summit presenting the newest information on MBPS as a quantum leap in through life sustainment starting at inception and continuing through fleet retirement.

2 February 2027 — Executive Crash Course PSA/LPD/ILS/IPS/MBPS — $395

An intensive, high-level presentation of the concepts and practices of critical supportability and sustainment processes. This course enables executive level decision-makers to improve their skills to effectively implement, manage and contract for demonstrable results in profitability and customer satisfaction.

8-11 February 2027 9-12 August 2027 — Product Support Analysis — $1,395

A detailed presentation of the lifecycle logistics process. The course presents the concepts, theories and philosophies of PSA, and then allows students to experience its application through realistic practical exercises. The new TA STD 0017A expands traditional ILS efforts into a formal in-service process for continuous improvement and enhancing availability and mission capability.

16-18 March 2027 14-16 September 2027 — Logistics Product Data — $995

A comprehensive presentation of the complete GEIA STD 0007C LPD including all data entities and relationships to the analysis processes of TA STD 0017A plus output reports from TA HDBK 0007-1A. The course discusses techniques for using the LPD for obsolescence management, disposal planning and in-service sustainment.

13-15 April 2027 5-7 October 2027 — A Commonsense Approach to RAM Concepts — $995

A comprehensive, commonsense presentation of the Reliability, Availability and Maintainability (RAM) processes used to improve system availability, expose design concerns and lower cost of ownership. Topics include testability, safety, FMECA/DMECA/FMEDA and RCM, and accelerated life testing. RAM is the basis for maintenance planning, CBM+ development, PPMx implementation, and sustainment resource development.

11-12 May 2027 — Performing Task Analysis — $695

An intensive and detailed presentation of proven techniques for performing accurate and usable task analysis. Meeting the requirements of both TA STD 0017A or ASD S3000L. Learn from the experts for commercial, military and aerospace requirements.

15-17 June 2027 2-4 November 2027 — The Provisioning Process and Supply Support — $995

Provisioning is a vital process that ultimately determines the materials that should be available to support maintenance of a system, and to achieve a required operational availability target for a hopefully reasonable cost. This course is a unique offering that is a guided tour through the “nuts and bolts” of the complete provisioning process. It encompasses every aspect of the process from start to finish. This course is the only one of its kind.
